EDUCATION

IITM, GGSIPU	Aug. 2024 – Present
Bachelor of Computer Applications (BCA), 2nd Year	Delhi
DAV Public School — Senior Secondary (Class XII)	AY 2023 – 2024
DAV Public School — High School (Class X)	AY 2021 – 2022

EXPERIENCE

Tech Department Head	2025 – Present
InternHub Club, IITM (GGSIPU)	Delhi
• Provide technical support to the club and guide fellow members in picking up new development skills • Set standards and workflows for the tech team's project delivery within the club • Coordinate with the Corporate Relations division to align technical resources with internship initiatives	
Peer Programming Tutor	2023 – 2024
DAV Public School / IITM	Ghaziabad
• Assisted fellow students in understanding HTML and Python fundamentals during academic sessions • Helped debug code and explained core programming concepts in a co-constructed learning environment	

PROJECTS

GTA: Pixel City	2025
JavaScript, Canvas API, Game Dev	blazeo8.github.io/pixel-city-game
• Built an interactive 2D browser game with a pseudo-3D feel entirely from scratch using the Canvas API, with no external game engine or framework • Implemented vehicle physics, a multi-weapon system (Pistol, Rifle, Shotgun, Minigun), and NPC AI with pathing and combat behavior • Designed a dynamic wanted-level system and a full mission structure to drive player progression	
B.L.A.Z.E — Desktop AI Assistant	2025
Python, PySide6, FastAPI, Groq LLM, Android/adb, scrapy	github.com/BlazeO8
• Built a ~12,000-line modular desktop AI assistant (Python/PySide6) with an LLM-driven chat engine (Groq), voice I/O (TTS + speech recognition), and a FastAPI backend • Integrated Google Workspace (Gmail, Calendar, Drive, Sheets, Tasks, YouTube) and Spotify APIs, plus proactive monitoring, reminders, automations, and a knowledge base • Engineered a live Android phone-mirror panel: an adb screenshot-polling fallback plus a true real-time mode reparenting scrapy's native H.264 decode into the Qt window via Win32/QWindow APIs	
Mixed Obby Game	2024
Roblox Studio, Lua	roblox.com/games/12171252028
• Designed and built a mixed obstacle-course game in Roblox Studio, published and playable to the public • Wrote Lua scripts to handle game logic, interactive checkpoints, and player progression mechanics	
Unreal Engine Game	In Development
Unreal Engine, C++, Blueprints	
• Building a 3D game in Unreal Engine, expanding from 2D browser and Roblox development into level design and engine workflows	

TECHNICAL SKILLS

Languages: Python, SQL, C, C++
Databases: MySQL, Query Optimisation
AI / ML: Prompt Engineering, AI Bots and Usage
Game Dev: JavaScript Canvas API, Roblox Studio (Lua), Unreal Engine (learning)
Web: HTML, CSS, JavaScript
Tools: GitHub, VS Code, Roblox Studio

CERTIFICATIONS

- C for Everyone: Programming Fundamentals & Structured Programming (Honors), C++ for C Programmers — UC Santa Cruz / Coursera
- Python Programming — DataFlair | Networking & Linux for Cyber Security (60 hrs) — Ducat, IITM
- Generative AI Mastermind — Outskill | Gen AI and Agentic AI — IITM / GRAS tech
- Claude 101, Claude Code 101 & Claude Platform 101 — Anthropic
